

species selection

canberra

The Provincial nurseries specialise in drought tolerant, low water use, easy care species - native and ornamental grasses, sedges, rushes, lillies, wetlands plants, Flora for Fauna, trees, shrubs and Grass Trees. You're invited to place a forward order to secure the stock you need when you need it.

Our quality plants are grown in outdoor, chemical free nursery spaces. Plants are grown from provenance collected seed using best practice collection and propagation techniques. Your plants will be supplied hardened against sun and frost to ensure they settle in well to your site.

Cells come in trays of 128 or 200, species dependant. Tube trays of Hiko's have 40 plants in each - cost of tubes and cells increases if individual or mixed species are required. A variety of 6" pots are also available – orders over 20 receive lower pricing. We provide discounts on bulk orders when you advise quantities we can ascertain a job specific quote for you.

For future reference, Provincial can provide you with a holistic range of water conscious products and services that can take your landscape from concept to completion, all under the one roof. Water wise landscape design, wholesale plant supply and planting, xeriscaping (low water, low maintenance gardens), revegetation, a boutique range of decorative pots, sculpture and water features and an exclusive selection of genuine reconstituted sandstone paving products all complementary in creating drought tolerant, environmentally sensitive outdoor spaces.

Provincial's dynamic and professional team of ecologists, environmental designers, horticulturalists, seed collectors and planters are proficient at delivering the quality product you need and expect, on time and on budget, and can save you time, money and resources shopping around.

We look forward to creating beautiful and sustainable environments together.
