

Dianella emperor's pearl™

elegant, upright form of *Dianella tasmanica*

ruling the landscape with an elegant touch

Dianella emperor's pearl™ expresses a regal display of bluish, upright foliage and demonstrates persistence in tough, full sun conditions. This seemingly effortless combination of these desirable qualities makes this *Dianella tasmanica* selection an outstanding, versatile and enduring cultivar

Basal leaves and sheaths tend to seasonal soft pinks in cooler months giving way to bold flowering displays that transform into purple-blue, olive-shaped berries in early summer. A dynamic plant that is both versatile in nature and seasonally variable

Tough, resilient and attractive, *Dianella emperor's pearl* was developed as part of 'The Provincial Collection' by Provincial Plants and Landscapes, Australia's NGIA Hall of Fame + National Environment Award Winners

full sun

part shade

low water use

drought tolerant

easy care

frost tolerant

flora for fauna

description	Bluish, upright , fast growing, hardy and long lived
maintenance care	Remove thatch to promote growth. Water every 4 weeks in drought or arid conditions
tolerates	Water as needed for first 2 - 3 months until established. Best results in mulched gardens. Apply slow release fertiliser once a year in spring
flowering	Light frost, moderate drought conditions
flower colour	Spring through to summer
position	Stunning display of deep lilac - blue flowers that transition to a spray of purple berries
height x width	Performs well in both full sun and shady environments in most soil conditions
spacing	< 60cm H x < 50cm W in full sun
uses	50cm apart for mass planting. 60 - 70cm apart for specimen planting
	Specimen, mass, median strip and roadside planting, revegetation, rockeries, container plant, filler and background plant in gardens

bred for vigour
