reasonable drainage
poor drainage

origin	NSW, Qld, Vic.
cultural notes	Adaptable to most soils and preferring a shaded position. It naturally occurs along watercourses or where there is consistent water, but seems to tolerate dry conditions in a garden situation. Fast growing.
maintenance	Prune after flowering to maintain a dense habit.
tolerates	Frost tolerant, moderately drought tolerant.
flowering season	Late Winter and Spring.
flower colour	Profuse pale yellow to cream flowers occur in rods to 4cm long. Long narrow seed pods.
foliage colour	Dark green linear phyllodes to 15cm in length, branches often become pendulous.
width	up to 4.5m
height	up to 6m
plant spacing	150cm apart
recommended uses	Good for windbreaks or hedges due to its attractive appearance and fast growth.
