water hardiness

Grevillea lanigera 'Mt Tamboritha'

grevillea lanigera 'Mt Tamboritha'

A dense groundcover spreading to 1.5m. Narrow leaves are grey-green and finely haired, giving them a soft woolly appearance. Flowers are spider-like clusters and can be red or pinkish-cream.

soil type and drainage

light - sandy soils
medium - loamy soils
good drainage

origin	NSW. Vic.
cultural notes	A very hardy plant that prefers a sunny position and well drained soils in cooler climates. Dislikes humidity.
maintenance	Can be pruned to maintain shape.
tolerates	Frost and drought tolerant.
flowering season	Late Winter and Spring.
flower colour	Red or cream flowers occur in spider-like clusters.
foliage colour	Narrow oblong shaped leaves are dark green but fine white hairs give them a greyish, woolly appearance.
width	up to 1.5m
height	up to 0.3m
plant spacing	100cm apart
recommended uses	An attractive groundcover often used in rockeries. More compact than many of the other prostrate Grevilleas.
