

Eucalyptus mannifera 'Little Spotty'

Brittle gum Dwarf

A smaller variety of *Eucalyptus mannifera*, growing to 8m in height with a round canopy and more pronounced mottling on the bark. Grey-green foliage and small white flowers in summer and autumn.

Origin	Cultivar.
Size	Up to 8 metres high, Up to 4 metres wide.
Cultural Notes	Adaptable to most soils provided they are free draining. Prefers an open and sunny position. Wildlife attractant.
Tolerates	Tolerant of frost, drought and poor soils.
Flowers / Flowering Season	Summer and autumn although the flowering season can differ depending on the climate. Clusters of small white flowers from green club-shaped buds. The fruit is dark brown, with three valved capsules.
Foliage Colour or Type	Grey-green lanceolate leaves, prominently veined, to 12cm in length.
Soil Type	Well-Draining, moist soil preferred. Is tolerant of most soil types and pH levels, being tolerant of poor soils.
Suited to	An attractive tree whose smaller size makes it ideal for smaller gardens. Very hardy. Care must be taken as to its placement due to its tendency to drop branches unpredictably.
