

Eucalyptus scorparia

Willow Gum

Typically grows to a medium-sized tree with a height of 10-15 m. Will form a lignotuber at the base of the tree. This tree has smooth, white and grey bark that sheds in long narrow strips. Has glossy light green foliage.

Origin	NSW, Queensland.
Size	Up to 10 metres high, Up to 10 metres wide.
Cultural Notes	Found in a few mountain ranges in between New South Wales and Queensland, often growing in clefts on large granite filled woodland areas, typically in high altitudes. Prefers full sun.
Tolerates	Manages heat and dry conditions as well as urban compaction.
Flowers / Flowering Season	Flowers are a white oval or pear shape, growing to 4-5mm long and 3-4mm wide. They're known to flower in and around November. The fruits are a woody cup-shaped capsule that grows to 3-5mm long and 4-6mm wide.
Foliage Colour or Type	The foliage is a glossy green on both sides, linear to lance-shaped or curved.
Soil Type	This tree can withstand very poor gravelly soils.
Suited to	A great tree for streetscapes and avenue planting as well as medium to large gardens.
