

Pyrus calleryana 'Cleveland select'

Ornamental Pear 'Cleveland select'

A small to a medium-size deciduous tree with a conical shape and a dense canopy. This is a perfect feature tree due to its clusters of small white flowers produced in spring, followed by small brown fruit. In autumn, the foliage will turn colours of red and purple.

Origin	China, Vietnam.
Size	Up to 6 metres high, Up to 10 metres wide.
Cultural Notes	Prefers full sun to part shade. The best time to fertilise is springtime. Prune back in winter is needed. This tree is a wildlife attractant.
Tolerates	Tolerates pollution and is wind resistant. Once establish will be drought tolerant.
Flowers / Flowering Season	Clusters of small, white flowers appear in springtime, followed by small brown fruit.
Foliage Colour or Type	Foliage is deep green, turning colours orange, red and purple through autumn before falling.
Soil Type	Well-draining soil is preferred. Is adaptable to most soil types.
Suited to	Ideal for narrow spaces due to their shape. Perfect feature tree that will work for small gardens, streetscapes and avenues.
