

Pyrus calleryana 'Red spire'

Ornamental Pear 'Red spire'

A deciduous tree that grows in a medium size with a conical shape. Foliage is green, which turns into vibrant reds and oranges during autumn. In spring, small white blossoms appear over its canopy, making this a lovely feature tree.

Origin	China, Vietnam.
Size	Up to 12 metres high, Up to 8 metres wide.
Cultural Notes	Full sun is preferred. Water in well after planting and keep the soil moist until the plant establishes. Prune and fertilise when planting will encourage new growth. This tree is low maintenance.
Tolerates	Resistant to disease and wind damage.
Flowers / Flowering Season	Small white flowers appear in springtime, followed by small inedible fruit.
Foliage Colour or Type	Foliage is bright green, turn colours of red and purple through autumn before falling. Leaves are an oval shape.
Soil Type	Well-Draining soil is preferred. Grows well in humus-rich soil.
Suited to	Great shade maker and feature tree, ideal for medium or large gardens. Great for streetscapes and avenues.
