

# Quercus bicolor

## Swamp Oak

This is a large-sized deciduous tree native to North America. The canopy grows in a wide dome shape with a short trunk, making this a fantastic shade creator. This tree is adaptable to a large range of environments. The Swamp Oak has bright green leaves, grey bark and will also produce acorns.

Origin	North America.
Size	Up to 25 metres high, Up to 25 metres wide.
Cultural Notes	Full sun to part shade preferred. This tree is not usually affected by pests or diseases.
Tolerates	Once established will have some tolerance to drought. Tolerant to waterlogging.
Flowers / Flowering Season	Will produce fruit acorns.
Foliage Colour or Type	Foliage is bright green and is a large oval shape. In autumn, the leaves will turn yellow and red-tinted browns.
Soil Type	Prefers well-draining soil. Acidic pH level is preferred. Will not adapt to alkaline soil.
Suited to	A great tree for parklands and Urban landscapes. Larger gardens are preferred due to their size and spread.
